CMD Racing is proud to announce the new 2005 Eagle SGX. Is it possible to improve on 126 mph and several national title and World Champion performances? Yes it is, because we did! Although our Eagle SG had tremendous success on the race circuit, our un-dying pursuit for perfection allowed us to

find room for improvement.

We have refined shapes and angles to enhance the performance. The Eagle SGX is also lower in profile and the booms are spread wide, front to back, for reduced flex and increased fuel capacity. The overall handling is much better and easier to trim. We continue to construct our hulls of Klegecell foam, Birch and Poplar plywood, Maple and Composite Fiber materials as well as upgrading to Okume plywood for the most versatile performance considerations. Over 17 years of designing and building Outriggers, continues to give us the experience to build the lightest, strongest, and fastest outriggers available in the world today

CMD Racing is proud of the performance and durability that our MAC engines deliver. They are true performance machines that have been engineered to satisfy the grueling demands of fierce competitors. Our Mac Engines hold several, Straight-Line, 2 Lap, and Heat Racing records in IMPBA, NAMBA, and APBA. New records are set month after month, as more and more new users put them to use within their own arsenal of high performance power plants.

2005

Inboard Marine Engine Descriptions

MAC .21

- same bolt pattern as Novarossi, CMB, & Picco

Records:

- 2001 NAMBA National Champion 3.5 Hydro
- 2001 IMPBA US-1 Champion 3.5 Hydro
- IMPBA 3.5 Mono Oval record time 26.496 seconds

MAC .45

- brushed drum housing
- steel rod with needle bearing and top bushing
- dynamically balanced drum valve
- large cooling capacity for sport hydros & vees
- five transfers with piston ports
- incorporates Sonic Flow exhaust porting by Andy Brown

Records:

- IMPBA District 3 Sport 40 Champion
- NAMBA District 19 B Mono Champion
- NAMBA District 19 B Hydro Champion
- B Mono record – 72.5 mph

MAC .67

- brushed drum housing
- steel rod with needle bearing and top bushing
- strong, well designed crankshaft with 8mm journal
- 8mm shaft threads
- same bolt pattern as Picco, CMB, K&B, OS Max, & Rossi

Records:

- IMPBA S.A.W. E Hydro – 106.1 mph / 169.8 kph
- IMPBA 1/3 mile Oval – 17.92 seconds
- NAMBA S.A.W. C Mono – 74.8 mph / 119.7 kph

MAC .84

- brushed drum housing
- steel rod with needle bearing and top bushing
- strong, well designed crankshaft with 8mm journal
- 8mm shaft threads
- same bolt pattern as Picco, CMB, K&B, OS Max, & Rossi
- dynamically balanced drum valve

Records:

- first R/C boat engine to exceed 125 mph / 200 kph
- record X Mono – 70.5 mph / 112.8 kph
- record F Hydro – 120.61 mph / 192.98 kph

High Performance Propellers by Andy Brown

Whether you race, set records, or play in the back yard pond with your electric cruiser, we can supply you with the propeller that will extract maximum potential from your engine and hull.

Allow us to help you achieve your Maximum Potential!

A properly tuned propeller can noticeably improve handling and can increase speed as much as 10 mph over the same stock propeller!

we stock
